

IT'S BETTER TO OVARY-ACT THAN NOT

A Cervical Screening Test will not detect ovarian cancer, there is no early detection test. We need your help to spread awareness and raise funds to support women living with ovarian cancer.

SIGNS & SYMPTOMS

Unexplained fatigue

Unexplained weight gain or loss

Changes in bowel habits, such as constipation

Increased abdominal size or persistent abdominal bloating

Abdominal or pelvic (lower tummy) pain

Feeling full after eating a small amount

Urinary changes, such as frequency or urgency

RISK FACTORS

A family history of ovarian cancer, breast or bowel cancer

Increasing age

Medical conditions such as endometriosis

Use of hormone replacement therapy (HRT)

Obesity

Tobacco smoking

A mutation in 1 of several known genes, e.g., BRCA1 or BRCA2 genes

Know the signs and symptoms.

The symptoms of ovarian cancer can be vague and similar to other medical conditions. It's important to see your GP if you experience any of these symptoms, especially if they are unusual for you or persistent. Download a Symptoms Diary from our website to track symptoms that may not be usual for you.
